

thyssenkrupp Bilstein, avand calitatea de furnizor de amortizoare pentru industria de automobile are ca obiectiv principal protectia mediului inconjurator, a sigurantei si sanatatii la acelasi nivel cu inalta calitate a produsului si rentabilitate optima ancorata in politica societatii.

Conscienti de faptul ca toate activitatatile, produsele si serviciile noastre determina impacturi asupra mediului, am definit si documentat politica de mediu care face parte integrata din politica generala a societatii.

Principalele puncte pe care se bazeaza politica de mediu, pe care ne-o asumam si pentru care luam masurile necesare pentru implementare, sunt:

1. Indeplinirea obligatiilor de conformare ale organizatiei si orientare spre client

- Noi asiguram conformitatea cu toate cerintele legale impuse de legislatia in vigoare, autorizatiile obtinute, reglementarile europene si evaluam periodic conformarea.
- Cunoasterea si indeplinirea cerintelor de mediu ale clientilor nostri
- Evitarea impactului negativ asupra oamenilor, animalelor sau naturii.

2. Protejarea mediului prin prevenirea poluarii

- Conscientizarea problemelor noastre de mediu si a importantei acestora
- Noi sustinem preventia prin identificarea si evaluarea sistematica a riscurilor de mediu ale activitatilor noastre
- Noi implementam eficient masuri de prevenire a riscurilor

3. Control pe intregul lant de aprovisionare

- Noi controlam lantul nostru de aprovisionare, asiguram o comunicare consecventa si indeplinim toate cerintele si expectatiile
- Noi verificam sistematic conformarea cu standardele de mediu in concordanta cu standardele noastre si cele ale clientilor nostri.
- Ne straduim sa obtinem certificarea ISO 14001 a tuturor furnizorilor si luam in considerare acest lucru in procesul de achizitie.

4. Imbunatatire continua

- Noi ne optimizam procesele pentru calitate, eficacitate, eficiență și stabilim standarde consecutive
- Noi ne imbunatatim continuu tehnicele, sistemele și metodele pentru a atinge excelenta
- Noi suntem responsabili față de angajatii nostri și incurajam conștientizarea, competența, performanța și munca în echipă.
- Conștientizarea actualelor provocări privind schimbările climatice și contribuirea activă la diminuarea efectelor propriei activității asupra întregii comunități.

Principalele puncte precizate mai sus constituie baza de referinta dupa care se stabilesc obiectivele si tinte de mediu pe care ni le propunem.

Intra in responsabilitatea conducerii sa se asigure ca aceasta politica este cunoscuta, inteleasa, urmata si mentinuta de catre toti salariatii, la toate locurile de munca si la toate nivelurile organizatiei.

Totodata, informatiile referitoare la sistemul de management de mediu si performantele acestuia sunt disponibile tuturor partilor interesate care solicita acest lucru.

Aplicarea prezentei politici de mediu reprezinta o prioritate pentru managementul de la cel mai inalt nivel al societatii iar fiecare salariat este obligat ca in sfera sa de activitate sa respecte politica de mediu.

Nerespectarea prezentei Politici de mediu poate atrage dupa sine actiuni disciplinare in functie de gravitatea incalcerii.

thyssenkrupp Bilstein, as a supplier of shock absorbers for the automotive industry, also aims to protect the environment, safety and health at the same level with high product quality and optimum profitability established in the company's policy.

Aware that all our activities, products and services have an impact on the environment, we have defined and documented the environmental policy that is an integral part of the general policy of the company.

The general principles on which the environmental policy is based, that we assume and for which we take the necessary measures for implementation, are:

1. Fulfillment of the organization's compliance obligations and customer satisfaction

- We ensure compliance with all environmental laws and regulations and review compliance regularly.
- Know and meet our customers' environmental requirements.
- Avoiding negative impacts on people, animals, and nature.

2. Protecting the environment by preventing pollution

- Creating awareness of our environmental issues and their importance.
- We practice prevention by systematically identifying and assessing the environmental risks of our activities.
- We effectively implement risk prevention measures.

3. Controlled supply chain

- We control our supply chain and ensure consistent communication and fulfillment of requirements and expectations.
- We systematically verify compliance with environmental standards according to our standards and those of our customers.
- We strive for ISO 14001 certification of all suppliers and take this into account in the procurement process.

4. Continual improvement

- We optimize our processes for quality, effectiveness and efficiency and set consistent standards.
- We continuously improve our tools, systems, and methods to achieve excellence.
- We take responsibility for our people and encourage awareness, competence, performance, and teamwork.
- We are aware of current challenges regarding climate change and actively contribute to reduce the effects of our own activity over the entire community

The specified points mentioned above represent the reference basis according to which the environmental objectives and targets that we propose are established.

It is the responsibility of management to ensure that this policy is known, understood, followed and maintained by all employees, at all levels of the organization.

Also, information on the environmental management system and its performance is available to all interested parties who request it.

The application of this environmental policy is a priority for management at the highest level of company and each employee is mandatory required in his activity field to respect the environmental policy.

Non-compliance with the present Environmental Policy may involve disciplinary actions considering the severity of the violation.
